Showreel

Creative technologist and technical director operating across game development, VR simulation, AI systems, and interdisciplinary R&D. Co-founder and managing director of Euclidean Studios, leading technical direction, systems design, and production across games and experimental media. Previously worked at the International Committee of the Red Cross on immersive simulation and organizational R&D, contributing to early AI strategy and cross-functional system design. Focused on building and aligning complex systems across technical and creative domains.

EXPERIENCE

Creative Technologist (VR Designer)

Nov 2021 - Oct 2025

International Committee of the Red Cross (ICRC) • Remote (Belgrade, Serbia & Geneva, Switzerland) / Hybrid

Worked in the ICRC Virtual Reality Unit on immersive simulations, R&D, and emerging technology strategy.

- Designed VR and non-VR simulation systems for training and operational contexts.
- Led systems design and technical structuring of simulation-based experiences.
- Managed projects across internal teams and external contractors.
- Conducted R&D initiatives and pitched experimental projects for internal funding.

Co-Founder & Studio Director

Jun 2018 - Present

Euclidean Studios • Belgrade, Serbia

Co-founded and leads an interdisciplinary game and R&D studio working across games, VR, 3D production, and interactive media.

- Leads technical direction, systems design, and production alignment across game development and R&D projects.
- Co-leads development of 'Nazralath: The Fallen World', a narrative CRPG with strong systemic design and aesthetic direction.
- Designed and implemented workflows spanning design, programming, 3D production, and narrative integration.
- Built and scaled an interdisciplinary team operating across games, film, advertising, and interactive media.

Creative Technologist

Apr 2019 - Jul 2019

New Strategy • Belgrade, Serbia

Worked in a cross-disciplinary consulting environment bridging technology, design, and business strategy.

- Provided technical insights into business design, product development, and marketing strategy.
- Collaborated with cross-functional teams on projects for regional enterprise clients.
- Acted as liaison for all technology-related questions, translating between design and engineering teams.
- Contributed to client presentations, strategic proposals, and communication of emerging technologies.

PROJECTS

Frontline Negotiations - AI Simulation
2023 - 2025

International Committee of the Red Cross (ICRC)

AI-driven interactive simulation enabling users to engage in negotiation scenarios with virtual agents.

- Ideated and designed an interactive negotiation experience combining AI, simulation, and human-centered storytelling.
- Defined the technical architecture for real-time interaction with AI-driven agents.
- Translated complex negotiation scenarios into immersive, interactive user experiences.
- Bridged narrative design, systems design, and technical implementation to deliver a cohesive experiential product.

Nazralath: The Fallen World
Feb 2019 - Present

Euclidean Studios

Narrative CRPG emphasizing systemic design, aesthetic cohesion, and worldbuilding.

- Serves as technical director and core systems designer.
- Designed architecture for progression tracking, dialogue systems, and persistent world state.
- Led development of multiple playable demos.
- Contributed to writing, visual direction, and production planning.

ACHIEVEMENTS

Acted as cross-functional technical translator in R&D environments

- Bridged technical and non-technical stakeholders across simulation, AI, and systems work.

Founded and scaled Euclidean Studios

- Built Euclidean Studios into an interdisciplinary operation spanning games, R&D, and interactive media.

Scaled ICRC VR Unit team from 4 to 8 members

- Led end-to-end hiring processes including role definition, interviewing, selection, and onboarding.
- Played a key role in expanding the unit's capabilities and delivery capacity.

SKILLS

VR & Simulation Design • XR | Systems Design • design | Technical Storytelling & Concept Translation • design | Technical Direction • leadership | AI Workflow Design & Tooling • AI | C++ (Gameplay Systems) • programming | R&D and Experimental Prototyping • R&D | 3D & Technical Art Pipelines • 3D

EDUCATION

MA - Design and Visual Communications
2019 - 2021

Faculty of Media and Communications

BSc - Computer Science (AI focus)
2016 - 2019

Singidunum University

Futures Studies Programme
2018 - 2019

Belgrade Open School
